

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A method, to provide a service to a user in a telecommunication network, comprising:

requesting access by said user to said telecommunication network; and

providing, by a notifying information service provider to said user, a notification which includes a capability to accept a service of an offered information service provider different from a service of said notifying information service provider.

2. (currently amended): ~~A~~ An information service provider, to provide a service to a user in a telecommunication network, comprising:

a notifier to provide a notification to said user, said notification including a capability for said user to accept a service of an offered second information service provider different from the service of said information service provider.

3. (currently amended): ~~A~~-An information service provider according to claim 2, wherein said information service provider is associated to an access subnetwork, whereby a virtual environment is identified with said information service provider and said access subnetwork.

4. (currently amended): ~~A~~-An information service provider according to claim 3, wherein said information service provider is also constituted by said offered information service provider.

5. (currently amended): ~~A~~-An information service provider according to claim 3, wherein said offered information service provider is constituted by a home information service provider of said user.

6. (currently amended): ~~A~~-An information service provider according to claim 3, wherein said information service provider is also constituted by a home information service provider of said user, whereby said virtual environment is constituted by a virtual home environment of said user.

7. (currently amended): ~~A~~An information service provider according to claim 2, wherein, when said information service provider is not associated to an access subnetwork, said information service provider is also constituted by a home information service provider of said user.

8. (currently amended): ~~A~~An information service provider according to claim 7, wherein said offered information service provider is associated to said access subnetwork, whereby a virtual environment is identified with said access subnetwork and said offered information service provider.

9. (canceled).

10. (currently amended): A telecommunication network comprising:

at least one information service provider to provide a service to a user in said telecommunication network, and

said information service provider includes a notifier to provide a notification to said user, said notification including a capability for said user to accept a service of an offered information service provider different from the service of said information service provider.
